## AR Solutions in Action

CDC's Investments to Combat Antimicrobial Resistance Threats

FISCAL YEAR 2022

## **U.S. VIRGIN ISLANDS**

\$76,032

Funding for AR Activities Fiscal Year 2022

## **FUNDING TO STATE HEALTH DEPARTMENTS**

\$76,032

RAPID DETECTION & RESPONSE: State, territory, and local public health partners fight AR in health care, the community, and food.

CDC-funded HAI/AR Programs form a network of health departments that detect, prevent, respond to, and contain HAI/AR threats and promote appropriate use of antibiotics and antifungals. CDC's AR Lab Network provides nationwide lab capacity to rapidly detect AR and inform local prevention and response activities to stop the spread of resistant germs and protect people.

This data represents CDC's largest funding categories for AR. It shows extramural funding that supports AR activities from multiple funding lines. Some work received full or partial funding from COVID-19 supplemental appropriations, such as the American Rescue Pla Act or the CARES Act.

AR: antimicrobial resistance COVID-19: coronavirus disease 2019
HAI: healthcare-associated infection IPC: infection prevention and control
NHSN: National Healthcare Safety Network

CDC provides critical support in the U.S. and abroad to protect people from antimicrobial resistance.
